

Dragons' Den - Nova Flo (video)

1. James Barnam has a first -class honours degree in industrial design.
2. He has invented a device that stops baths from overflowing.
3. His invention fits under (underneath) the tap (le robinet)
4. It takes about 20 minutes to fit.
5. James Barnam's projected turnover in 3 years is 150,000 units.
6. He came up with this idea 1 year ago.
7. Other companies produce electrical products that are more costly and difficult to install.
8. James Barnam is asking the Dragons for £150,000
9. in exchange for a 10% share of his company.
10. The Dragons' best offer is for 40% of his company.
11. James Barnam eventually turns down (refuses) the Dragons' offer.
